TECHNICAL SKILLS

IoT & Embedded Systems

Arduino ESP32 Sensors
Actuators Microcontrollers
Embedded Systems Electronics
IoT Architecture

Programming

C/C++ JavaScript HTML CSS

Web & 3D

Web Development Three.js
Interactive Interfaces
Web Dashboards

Cybersecurity & Systems

Wazuh SIEM Linux Proxmox
Virtualization Log Analysis
Security Monitoring SOC Concepts

Development Tools

Git GitHub Arduino IDE

ENGINEERING INTERESTS

IoT & Connected Systems
Embedded Systems
Smart Technologies
Robotics
Automation
Artificial Intelligence
Innovative Engineering Solutions

LANGUAGES

Arabic
French
English

Turning ideas into
smart solutions

PROFESSIONAL PROFILE

Engineering student at ESPRIT, currently in the 4th year of an engineering program with a focus on Internet of Things (IoT). Interested in the development of smart systems combining hardware, software, embedded systems, sensors, connectivity and intelligent technologies.

Hands-on experience through internships in cybersecurity and data analytics, including practical work with Wazuh SIEM, Linux, virtualization and Proxmox. Passionate about building innovative engineering projects and continuously developing technical skills through practical experimentation and project-based learning.

EDUCATION

ESPRIT — École Supérieure Privée d'Ingénierie et de Technologies
Engineering Degree — IoT Specialization
Tunis, Tunisia | 2023 – Present

- Currently in 4th year of engineering studies.
- Focus on IoT, embedded systems, software development and smart technologies.
- Academic projects combining hardware and software development.

PROFESSIONAL EXPERIENCE

PROLOGIC TUNISIE
Cybersecurity Intern
Tunis, Tunisia | Jul 2026 – Aug 2026

Cybersecurity

- Worked with Wazuh SIEM for cybersecurity monitoring and security event analysis.
- Deployed and configured Wazuh Manager, Wazuh Indexer and Wazuh Dashboard in a Proxmox virtualized environment.
- Worked with Linux systems, virtualization, SIEM technologies and log analysis.
- Gained hands-on experience in Security Operations Center (SOC) concepts and security monitoring workflows.
- Developed practical understanding of deploying and managing a security monitoring infrastructure.

MASS ANALYTICS
Intern — Data Analytics & Business Intelligence
Tunis, Tunisia | Jul 2024

Data Analytics

- Completed an introductory internship in data analytics and business intelligence.
- Discovered professional data processing workflows and analytics practices.
- Gained an understanding of how data is transformed into insights to support business decision-making.
- Developed initial exposure to professional data-oriented environments.

FEATURED ENGINEERING PROJECTS

AGRINOVA Selected for the Bal de Projet
Smart Agriculture IoT Solution
IoT Arduino Sensors Web Dashboard

- Designed an IoT-based solution for smart agriculture.
- Integrated sensors and embedded hardware.
- Developed a web interface/dashboard.
- Combined hardware, software and IoT concepts.

ASTROQUEST Selected for the Bal de Projet
Interactive IoT Game Controller
ESP32 C/C++ LCD Buttons Joystick Motors

- Developed an interactive PC gaming controller.
- Worked with ESP32-based architecture.
- Integrated joystick, buttons, LCD display and motors.
- Developed interaction logic and communication.

ACHIEVEMENTS

- Project Selection — Bal de Projet: AgriNova
- Project Selection — Bal de Projet: AstroQuest
- Hands-on internship experience in Cybersecurity and Data Analytics / Business Intelligence.
- Developed multiple engineering projects combining hardware and software.
